Native A/B/C: structural integrity and polymer preparation memory
A Reference contact retention
Cα reference-contact fraction Q
Preparation
A
B
C
Umbrella center (nm)
B Protein core deviation
Core Cα RMSD (nm)
Umbrella center (nm)
C Polymer size
PS radius of gyration (nm)
Umbrella center (nm)
D Polymer shape
Relative shape anisotropy
Umbrella center (nm)
Window means over 2–5 ns; biased ensembles, not independent equilibrium replicas. Reference Q is geometric, not a folding free energy.
